Customizing Pro/ENGINEER with Pro/TOOLKIT

Module 1: Introduction to Pro/TOOLKIT.....	1-1
Section 1: Introduction.....	1-2
C/C++ Programming.....	1-2
Section 2: Installation and Setup	1-3
Directory Structure	1-3
Section 3: Application Types	1-4
Synchronous.....	1-4
Multi-Process.....	1-5
Simple Asynchronous.....	1-5
Full Asynchronous.....	1-6
Section 4: Object Types.....	1-6
OHandles	1-6
DHandles.....	1-7
Section 5: Error Handling	1-7
Error Handling Library (Unsupported)	1-8
Section 6: Pro/TOOLKIT API Wizard	1-9
Topic/Object Selection Frame	1-10
Find Feature	1-11
Exercise 1: API Wizard Interface	1-12
Module 2: Visual Studio .NET.....	2-15
Section 1: Environment Variables.....	2-16
Section 2: Synchronous Project.....	2-17
Source Files	2-18
Debug Configuration	2-21
Release Configuration	2-28
Section 3: Multi-Process Project	2-36
Section 4: Simple Asynchronous Project	2-36
Source Files	2-38
Debug Configuration	2-39
Release Configuration	2-44
Section 5: Synchronous Debugging.....	2-48
Module 3: Synchronous Application	3-53
Section 1: Application Registration	3-54
Section 2: Required Functions	3-55
user_initialize()	3-55
user_terminate()	3-56
Section 3: Message Files	3-56
Message File Contents	3-57
Message Classification.....	3-58
Displaying Messages	3-59
Retrieving Keyboard Input	3-59
Section 4: Creating Menus and Buttons.....	3-60
Creating a Menu bar Menu.....	3-60
Creating a Command	3-61
Creating a Button	3-61
Exercise 1: Simple Application	3-63

Module 4: Model Management	4-70
Section 1: Model Object Hierarchy.....	4-71
Section 2: Model Retrieval	4-71
Model Display	4-72
Section 3: Pro/ENGINEER Modes.....	4-72
Section 4: Regeneration.....	4-73
Regeneration Loop.....	4-73
Section 5: Erasing Models.....	4-74
Exercise 1: Model Retrieval	4-75
Module 5: Parameters	5-81
Section 1: Accessing Parameters	5-82
Model Item Objects.....	5-82
Visiting Parameters.....	5-83
Section 2: Parameter Values	5-83
Retrieving Values.....	5-84
Setting Values	5-85
Section 3: Parameter Information	5-86
Section 4: Creating Parameters.....	5-86
Exercise 1: Listing Model Parameters	5-88
Module 6: Features	6-93
Section 1: Accessing Features	6-94
Feature Objects.....	6-94
Visiting Features	6-94
Section 2: Feature Information.....	6-95
Section 3: Feature Geometry	6-95
Geometry Objects	6-96
Visiting Geometry.....	6-96
Section 4: Feature Status.....	6-97
Exercise 1: Listing Solid Features.....	6-98
Module 7: Assemblies	7-108
Section 1: Assembly Structure	7-109
Assembly Objects.....	7-109
Component Paths.....	7-109
Section 2: Accessing Components	7-110
Visiting Components.....	7-110
Finding Components by Rule	7-111
Component Information.....	7-112
Exercise 1: Traversing an Assembly.....	7-113
Module 8: Selection	8-121
Section 1: Interactive Selection	8-122
The ProSelection Object	8-122
User Selection.....	8-122
Section 2: Selection Filters	8-124
Pre-Selection Filter	8-124
Post-Selection Filter	8-125
Post-Selection Action	8-126
Section 3: Selection Environment	8-126
Section 4: Selection Functions.....	8-127
Section 5: Manual Construction	8-127
Exercise 1: Interactive Selection	8-129
Module 9: Drawings	9-138

Section 1: Drawing Creation 9-139
 Creation Errors..... 9-139
Section 2: Drawing Solids 9-140
Section 3: Drawing Operations 9-141
 Drawing Views 9-141
 Drawing Sheets..... 9-141
 Drawing Tables 9-142
 Drawing Formats 9-143
Exercise 1: Drawing Creation 9-145
Appendix 1: Supporting 64-bit 9-156
 Section 1: Platform SDK Installation 9-156
 Section 2: Environment Variables 9-156
 Section 3: Visual Studio .NET Environment..... 9-157
 Section 4: 64-bit Project Settings..... 9-159
