

WINDCHILL PLM VALIDATION

The **Object** **Validator** that *sets the standard.*

50+ fully configurable rules — more than double what competitors offer. Designed to adapt to your unique business needs, no coding required.

NO-CODE

50+ RULES

API-READY

KEY CAPABILITIES

Unmatched flexibility, deeper control, broader coverage across your release processes.

- ✓ **Work Instructions**
Clear HTML, plain text & link-based fix guidance per validation.
- ✓ **Dashboard**
Real-time, interactive analysis with dynamic filters.
- ✓ **Rule Grouping**
Parent-Child logic for complex scenarios and dependencies.
- ✓ **Context Control**
Enable or disable rules per Product or Library context.
- ✓ **API / Web Services**
Trigger validations from external systems & retrieve data.
- ✓ **Unified Platform**
All features in one plugin — not separate extensions.
- ✓ **Right-Click Validation**
Validate objects directly from the Windchill UI.
- ✓ **Import / Export Rules**
Move rules across Windchill systems from the rule manager.

FEATURE COMPARISON

FELCO Object Validator vs. Competitors

CAPABILITY	FELCO	COMPETITORS	WHY FELCO IS BETTER
Work Instructions	✓	!	HTML, plain text & links with fix guidance
Scalable Views	✓	✓	Handles large, complex validations by changing table perspectives
Rule Grouping	✓	—	Parent-Child logic for complex dependencies
Dashboard	✓	—	Real-time analysis with interactive filters
Manage Custom Rules	✓	—	Admin creates rules via a separate manage plugin
Context Control	✓	—	Enable/disable rules per Product or Library context
Change Object Coverage	✓	!	Full lifecycle — all Change Objects & Promotion Requests
API / Web Services	✓	—	Trigger validations from external systems
Workflow Callouts	✓	!	Invoke multiple rules within workflow processes
Unified Platform	✓	—	All features in one plugin, not separate extensions
Import / Export Rules	✓	—	Move rules across Windchill systems easily

✓ Fully Supported ! Limited — Not Available

SPOTLIGHT

Object Validator Dashboard

A centralized, interactive interface for real-time validation analysis. Instantly monitor data integrity through dynamic filters and actionable insights — all in one place.

SPOTLIGHT

Rule Manager

A user-friendly, no-code administrative interface. Effortlessly configure, manage, and deploy over 50 unique validation rules across your entire Windchill environment.

KEY ADVANTAGE

No Coding Required

Every rule is designed to adapt to your unique business needs — delivering unmatched flexibility and deeper control without writing a single line of code.
